The page is in the archive.

The President of the Energy Regulatory Office has approved three incremental capacity projects for the Poland-Germany and Poland-Czech Republic interconnection points

After having examined the applications of the Gas Transmission System Operator - Operator Gazociągów Przesyłowych GAZ-SYSTEM S.A. on 29 April 2021, the President of the URE approved two incremental capacity projects for the Poland-Germany Market Borders (E-GAS Transmission System - Trading Hub Europe and Polish Transit Gas Pipeline System Yamal/Wester Europe - Trading Hub Europe) and for the Border between Poland and the Czech Republic .

The bundled offer levels^[1] will be available in the yearly capacity auctions for a 15-year period and will be made available to the market from the following gas year^[2]:

2026/2027: for the GCP interconnection point on the border between Poland (E-Gas Transmission System) and Germany (Trading Hub Europe) in the amount of 493 499 kWh/h/y;

2027/2028: for the Mallnow interconnection point on the border between Poland TGPS (Transit Gas Pipeline System) and Germany (Trading Hub Europe) in the amount of 22,262,400 kWh/h/y;

2028/2029: for the Cieszyn interconnection point on the border between Poland-Czech Republic in the amount of 1,143,000 kWh/h/y.

Approval of the above-mentioned capacity projects was preceded by a consultation process.

All decisions are available on the Office's website in the link above: [Decyzje - Urząd Regulacji Energetyki \(ure.gov.pl\)](#).

Please be informed that the decisions were issued only in Polish language and only these

versions are binding. The published decisions in English language versions are only translations of the issued decisions in Polish language.

^[1] "offer level" - in accordance with Article 3(5) of Regulation (EU) 2017/459, means the sum of the available capacity and the respective level of incremental capacity offered for each of the yearly standard capacity products at an interconnection point.

^[2] The period from 6:00 am on October 1 of a given year to 6:00 am on October 1 of the following year. The definition can be found in the SGT Gaz - System Transmission Network Code.
